

Once you have registered with GoNetspeed and created your online account, it is time to start the installation process!

For service support, please call us at 855-891-7291

17

GoNetspeed bills the 17th of every month, so you will not be charged anything until the 17th following your install.

- Please be sure to add your **Payment Account** to your GoNetspeed online account prior to installation.
- Your first bill will include your installation fee, pro-rated monthly fee from your installation date through the end of the billing cycle and it will also include charges for the following month since we bill one month in advance. Going forward, you will just see your set monthly service charge.
- Your credit card on file will be charged **automatically** each month. You do not have to manually submit payment.
- There are no taxes or fees unless a late charge is applied.
- Invoices will be viewable within your account on the 17th of every month or the first business day following the 17th. The first page of the invoice will show a summary of your charges, along with a second page that will provide a detailed breakdown.
